Control of isometric finger force in patients with cerebellar disease. N. Mai, P. Bolsinger, M. Avarello, H.-C. Diener and J. Dichgans

Familial myopathy with changes resembling inclusion body myositis and periventricular leucoencephalopathy. A new syndrome. A. J. Cole, R. Kuzniecky, G. Karpati, S. Carpenter, E. Andermann and F. Andermann

The role of macrophages and eicosanoids in the pathogenesis of experimental allergic neuritis. Serial clinical, electrophysiological, biochemical and morphological observations. H.-P. Hartung, B. Schäfer, K. Heininger, G. Stoll and K. V. Toyka

Cholinergic 'blockade' as a model for cholinergic depletion. A comparison of the memory deficits with those of Alzheimer-type dementia and the alcoholic Korsakoff syndrome. M. D. Kopelman and T. H. Corn

Impaired grammar with normal fluency and phonology. Implications for Broca's aphasia. S. E. Nadeau

Ideational apraxia. E. De Renzi and F. Lucchelli

Distant referral of cutaneous sensation (Mitempfindung). Observations on its normal and pathological occurrence. G. D. Schott

Autonomic disturbances in cluster headache. P. D. Drummond

Chorea and myoclonus in the monkey induced by gamma-aminobutyric acid antagonism in the lentiform complex. The site of drug action and a hypothesis for the neural mechanisms of chorea. A. R. Crossman, I. J. Mitchell, M. A. Sambrook and A. Jackson

Myoclonus in a patient with spinal chord transection. Possible involvement of the spinal stepping generator. B. Bussel, A. Roby-Brami, Ph. Azouvi, A. Biraben, A. Yakovleff and J. P. Held

Directions to authors on the preparation of papers

PAPERS must be typewritten on one side of the paper only and double-spaced, and submitted in triplicate with three sets of figures. In addition to the full title of the paper, authors should supply a 'running title' which will appear at the heads of the pages. *Brain* does not publish preliminary reports of work in progress, or brief accounts of single cases. More detailed studies on single cases, if appropriate, are acceptable. Papers reporting experiments on patients or healthy volunteers must record the fact that the subjects' informed consent was obtained (Declaration of Helsinki: *Brit. Med. J.* 1964, 2, 177). Review articles, if authoritative and topical, will also be considered. The typescript should be carefully and finally revised before submission to the Editor, so that if the paper is accepted it is ready for the printer. Clarity of style and brevity of expression are essential. Before submitting a paper it is always valuable to obtain the comments of colleagues who are unfamiliar with the work. We refer intending authors to the *Journal of Physiology*'s 'Suggestions to Authors', free of charge from Cambridge University Press, Shaftesbury Road, Cambridge CB2 2BS. SI units should be employed. If prepared on a word processor, papers printed with a low resolution dot-matrix type will not be considered.

The paper should be accompanied by a declaration in the following terms: 'The work reported in the attached paper entitled ... has not been, and is not intended to be, published anywhere except in *Brain* and signed by all the authors.

BIBLIOGRAPHIC REFERENCES should be limited to essential literature; they should be listed at the end of the paper in alphabetical order, and not numbered. In the case of a Journal: author's name, date of publication in brackets, the volume number and the first and last page numbers of the paper quoted, both in Arabic numerals. In the case of a book: author's name, date of publication in brackets, title of book underlined for italics, place of publication, publisher's name, chapter and page numbers in Arabic numerals. Works by the same author should be given in chronological order, and if there are more than one in a year, they are marked a, b, c, etc. For multiple publications by the same author with two or more associates, chronological order should be adopted, again with the designation a, b or c if there is more than one publication in a year. In the text numbered references are not used, but the author's name is followed by the appropriate year in brackets. The punctuation should follow the style adopted by the journal (see current issue).

ILLUSTRATIONS should, where possible, be glossy prints of line drawings, numbered and with the author's name on the back. Drawings and other illustrations should not exceed twice the size of the reproduction and thus lines must be thick enough to show up after reduction; neither should they be too small, by the journal

Half-tone photographs must be kept to a minimum. Excellent photographs with clear contrast are essential, especially for the reproduction of electron micrographs. Authors may be asked to contribute to their cost. There should be a bar on all micrographs giving magnification, e.g. 1 \( \mu m \).

Authors are asked not to reprint their papers, or to authorize others to do so, without first consulting the Oxford University Press (Academic Division), Walton Street, Oxford OX2 6DP.

Fifty free offprints are sent to the authors, who may order more direct from Oxford University Press, Walton Street, Oxford OX2 6DP when they get their proofs.

Reduced rates are available for personal subscribers. For further details please contact the Journals Subscriptions Department. Prices include postage.

Orders and inquiries for back numbers: Wm Dawson & Sons Limited, Cannon House, Folkestone, Kent. Orders and inquiries for out of print back numbers: Swets & Zeitlinger B.V., Heereweg 347-b, PO Box 810, 2160 SZ Lisse, Holland.

Journals Advertisement Manager and inquiries about offprints and copyright: Journals Production, Oxford University Press, Walton Street, Oxford OX2 6DP.
Control of isometric finger force in patients with cerebellar disease. N. Mai, P. Bolsinger, M. Avarello, H.-C. Diener and J. Dichgans 973

Familial myopathy with changes resembling inclusion body myositis and periventricular leucoencephalopathy. A new syndrome. A. J. Cole, R. Kuzniecky, G. Karpati, S. Carpenter, E. Andermann and F. Andermann 1025

The role of macrophages and eicosanoids in the pathogenesis of experimental allergic neuritis. Serial clinical, electrophysiological, biochemical and morphological observations. H.-P. Hartung, B. Schäfer, K. Heininger, G. Stoll and K. V. Toyka 1039

Cholinergic ‘blockade’ as a model for cholinergic depletion. A comparison of the memory deficits with those of Alzheimer-type dementia and the alcoholic Korsakoff syndrome. M. D. Kopelman and T. H. Corn 1079

Impaired grammar with normal fluency and phonology. Implications for Broca’s aphasia. S. E. Nadeau 1111

Ideational apraxia. E. De Renzi and F. Lucchelli 1173

Distant referral of cutaneous sensation (Mitempfindung). Observations on its normal and pathological occurrence. G. D. Schott 1187

Autonomic disturbances in cluster headache. P. D. Drummond 1199

Chorea and myoclonus in the monkey induced by gamma-aminobutyric acid antagonism in the lentiform complex. The site of drug action and a hypothesis for the neural mechanisms of chorea. A. R. Crossman, I. J. Mitchell, M. A. Sambrook and A. Jackson 1211

Myoclonus in a patient with spinal chord transection. Possible involvement of the spinal stepping generator. B. Bussel, A. Roby-Brami, Ph. Azouvi, A. Biraben, A. Yakovleff and J. P. Held 1235

NEW FROM OXFORD

THREE NEW EDITIONS

Autonomic Failure
A Textbook of Clinical Disorders of the Autonomic Nervous System
Second Edition
Edited by Sir Roger Bannister
This new edition describes recent advances in the management of autonomic disorders in diseases such as diabetes and alcoholism, as well as in the syndromes of chronic, sub-acute and acute autonomic failure. It continues to provide a detailed, up-to-date guide to diagnosis, investigation, and treatment.
0 19 261664 1, 800 pp., illus., April 1988
£60.00

Neurobiology
Second Edition
Gordon M. Shepherd
Recent discoveries in molecular neurobiology have been integrated into the revision of this wide-ranging text, along with a new chapter on molecular mechanisms and revised illustrations and examples.
"it is easy to be enthusiastic about this superb volume." Journal of the American Medical Association on the 1st edition
0 19 505171 8, 702 pp., illus., OUP USA, July 1988
£55.00
0 19 505172 6, paperback, July 1988
£19.50

Tuberculous Meningitis
Tuberculomas and Spinal Tuberculosis. A Handbook for Clinicians
Second Edition
Malcolm Parsons
Tuberculous meningitis is a potentially lethal condition, but curable if diagnosed early and treated correctly. This quick reference guide to the disease also surveys the literature on the subject, and has been completely updated.
"doctors should get hold of this valuable book" The Lancet
0 19 261721 4, 144 pp., illus., April 1988
£15.00

Spinal Cord Dysfunction
Assessment
Edited by L. S. Illis
Spinal injury specialists and neuroscientists discuss contemporary ideas and the role of models, neuropathology, neuro-radiology, and neurophysical techniques in assessing spinal cord damage.
0 19 261624 2, 314 pp., illus., June 1988
£40.00

The Neural and Behavioural Organization of Goal-Directed Movements
Marc Jeannerod
This book presents a detailed investigation of a topic of growing interest at the boundaries of psychology and physiology. It is based on a large body of experimental data from human and animal work, with emphasis on illustrative clinical cases.
Oxford Psychology Series No. 15
0 19 852117 0, 294 pp., illus., Clarendon Press, April 1988
£52.50
